EDUCATION

New York University

Master of Science in Information Systems

New York, NY

Expected May 2027

Rensselaer Polytechnic Institute

Bachelor of Science in Information Technology and Web Science

Troy, NY

Aug 2021 – May 2025

- **GPA:** 3.61/4.00
- **Relevant Coursework:** Data Structures, Foundations of Computer Science, Web Development, Computer Organization, Network Programming, Introduction to Algorithms, Operating Systems, Database Systems

PROJECTS

MissionFlow - United Airline Airshop Lab

Software Developer

Troy, NY

Sep 2024 – Dec 2024

- Engineered a web-based application using Agile methodology and in collaboration with United Airlines' Airshop Lab, resolving inefficiencies in robotic R&D mission management and reducing setup time by 40%
- Built a centralized Node.js and MongoDB system to automate mission data organization, file transfer, command execution, and post-mission analysis, cutting manual overhead by 50% and minimizing delays
- Utilized the Boston Dynamics API to streamline mission configuration and execution directly from the app, improving robotic workflow efficiency and responsiveness by 25%
- Enhanced scalability and maintainability through React-based modular components, increasing capacity for complex robotic scenarios

Ryan's Ice Cream Online Ordering System

Software Developer

Troy, NY

Jan 2024 – Apr 2024

- Designed and developed an online cake-ordering system using AppFront to modernize business operations, creating an intuitive and responsive interface prototyped in Figma, and increasing online sales by 35%
- Applied Agile methodology to build, test, and refine features like secure payment, real-time tracking, and inventory management, improving fulfillment efficiency and reducing errors by 20%
- Liaised with stakeholders to gather business and technical requirements, oversee user testing, and coordinate deployment, resulting in a reliable and user-friendly platform
- Performed business analysis to help the small business adopt modern digital solutions, delivering an easily maintainable website that supports data-driven insights and long-term scalability

EXPERIENCE

Haier Group Corporation

Software Engineer Intern

Qingdao, China

Sep 2023 – Dec 2023

- Identified limitations in the legacy C-based codebase that constrained adaptability to modern frameworks and cross-platform deployment, prompting a shift toward more efficient development technologies
- Proposed and led the adoption of Flutter to modernize the user interface for laundry machine touch panels, enabling seamless deployment across Linux, Windows, and macOS, and improving development efficiency by 50%
- Coordinated with the engineering team to explore and integrate new Flutter plugins that facilitated smoother frontend-backend communication and enhanced hardware interaction reliability
- Assisted in maintaining and optimizing the existing system during migration, ensuring service continuity, and coordinated with overseas clients to align technical requirements and resolve deployment issues

TECHNICAL SKILLS

Programming Languages: Python, C, C++, Java, JavaScript, TypeScript, SQL, PHP, HTML, CSS

Frameworks and Libraries: React.js, Node.js, Express.js, Flutter

Databases: PostgreSQL, MongoDB

Tools and Technologies: Git, REST API, Docker, Agile
